

**An estimated 6.7 million Americans suffer from chronic wounds caused by, vascular disorders, diabetes, radiation tissue damage, infections and other traumatic events.**

If a wound has not shown significant progress towards healing in 30 days, it's considered a chronic wound. A slow-healing wound needs the expertise of a multi-specialty wound care team. R3 Wound Care and Hyperbarics is here to help.

### **These wounds include:**

- DIABETIC wounds or ulcers
- RADIATION wounds or complications
- TRAUMA wounds
- SURGICAL wounds
- PRESSURE injuries
- ACUTE wounds
- Any wounds that are troublesome no matter how small or large

**YOUR PARTNER FOR  
PATIENT HEALING**

**WOUND CARE  
and HYPERBARICS**

*A specialized team of healthcare professionals & advanced treatments to effectively heal slow healing wounds*

We know your patients' health and healing are of utmost importance, so we work with you to help enhance your patient's healing potential through our personalized, innovative, and compassionate care.

## **Our wound care teams specialize in the following advanced treatments to help heal these conditions as quickly & effectively as possible:**

- Diabetic wound care and education
- Debridement
- Post-surgical incision management
- Wound vac
- Limb salvage
- Infection control and management
- Skin substitutes
- Hyperbaric Oxygen Therapy (HBOT) for adults and children
- Cancer and radiation care
- Incision and drainage
- Unna boot

## **Hyperbaric Oxygen Therapy Treatment**

Hyperbaric Oxygen Therapy (HBOT) is a very specialized therapy that quickly delivers 100% pure oxygen in high concentrations to injured areas of the body. This increased level aids in the body's healing process and enhances the white blood cells' ability to fight infections. Plus, it can also promote the development of new capillaries, aid in building new connective tissues, and helps the organs to function optimally.

The FDA currently recognizes HBOT for the following conditions, all of which are generally covered by insurance:

- Diabetic wounds of the lower extremities
- Acute peripheral arterial insufficiency
- Delayed radiation injury (soft tissue radionecrosis)
- Osteoradionecrosis
- Compromised skin grafts and flaps
- Refractory osteomyelitis
- Crush injuries
- Acute traumatic peripheral ischemia
- Gas gangrene
- Air or gas embolism
- Carbon monoxide poisoning
- Decompression sickness
- Exceptional blood loss/Anemia
- Intracranial abscess
- Necrotizing soft tissue infections
- Thermal burns
- Sudden sensorineural hearing loss

## **Why Partner with R3?**

- Largest independent outpatient Hyperbaric Oxygen facility in North Texas
- In-network contracts with all major insurance companies including Tri-Care and Medicare
- Generally 40% less expensive than a hospital system
- Only non-hospital affiliated clinic that treats the 14-approved indications for HBOT
- Equipped with state-of-the-art equipment
- Average 5-Star Google rating
- Transportation services available for patients in need within 25-mile radius after 1st hyperbaric visit

## **How To Refer To Us**

We want to assure you that we are a supportive and complementary service that aims to help you heal your patients more quickly and effectively.

To refer a patient, please email or fax your referral form or download R3's referral form at [r3healing.com/physicians](http://r3healing.com/physicians). We are also happy to send you our referral pad at your request.

R3 takes care of all pre-certifications, so all that is needed is a referral, patient demographics and the most recent progress note.
